The Federal Communications Commission is considering taking actions that will restrict consumer choice by deregulating local phone service.

Millions of Americans like me could have their phone service threatened if the local phone companies aren't required to allow competitors access to the market. I'm also concerned about the Commission's move to relieve all broadband Internet access facilities of open access obligations.

Both of these key decisions will limit my choices as a consumer by lessening competition, diminishing cost savings and threatening consumer protections. As a constituent, I urge you to support competition and open access for local phone service.

Sincerely,

walerian szleser

Washington, DC 20554

Dear Chairman Powell:

This letter is written in support of the issues and concerns raised by members of the House of Representatives regarding potential changes under consideration by the Commission with respect to competitor's access to the existing telephone network. That correspondence addressed several issues including (1) consumer advocates' concerns that the proposal would lead to higher rates for local telephone service; (2) CLEC concerns that proposed changes would curtail their services or be forced out of business; (3) long distance carriers' concerns that Bell Companies would gain a significant

advantage in providing long distance service; (4) independent Information Service Providers concerns that they would be placed at a significant competitive disadvantage; (5) state regulators, such as this Board, concerns that we would be preempted by FCC regulations and, since we utilized the UNE-P framework for assessing sufficient local competition to recommend long distance entry by Verizon, the proposed changes would undermine local competition; and (6) small business' concern that they would lose competitive alternatives if UNE-P and existing network access rules were eliminated.

As we have stated repeatedly in the past several months, we are particularly concerned with state preemption and the potential elimination of the UNE-P. We have experienced significant inroads by competitors into the residential and small business local exchange markets over the last 6 months which is directly attributable to lower UNE rates and the availability of the UNE-P. Without the platform, these consumers will see little or no competitive alternatives. We again urge the Commission to give the states the discretion we need to tailor rules to our market and not set mandatory nationwide rules that cannot possibly account for the unique circumstances in each individual state. In addition, this Board and the FCC relied upon, among other things, the availability of UNE-P in determining that the local market in New Jersey was sufficiently open to allow Verizon-New Jersey to enter the long distance market. Elimination of UNE-P will cause the carefully crafted balance between local and long distance markets to be skewed toward Verizon and the other Regional Bell Operating Companies at the expense of competitors and consumers.

In conclusion, we would urge the Commission, as do the members of Congress who authored the January 24, 2003 letter, to address the concerns of consumers, CLECs, long distance companies, independent ISPs, small businesses and state utility commissions as part of your deliberation of these complex public policy issues.

Sincerely,

Jeanne M. Fox, President
